

Radio Active

The music we cover is Radio sourced and actively pursued:

Chances are if you heard it on the radio today, it's currently on rotation in our playlist.

Charged with the explosive voice of Lady Plutonium and the stellar guitar riffs of Master Blaster, highlighted by the molten hot sax of Atom Bomb, and underlined by the rhythm of Johnny Neutrino on bass and Auntie Gravity on drums, the group fused together an entire set list of some of the best known classic and modern rock songs spanning the ages. With smoldering harmonies and clever musical machinations, this group has reworked familiar hit songs and effectively doubled their half-life.
